Education

Vidya Pratishthan's Kamalnayan Bajaj Institute of Engineering and Technology, Baramati Nov '22 - May '25
Bachelor of Engineering in Artificial Intelligence and Data Science (CGPA: 7.97 / 10) Baramati, Maharashtra

Government Polytechnic Pune Aug '19 - July '22
Diploma in Computer Engineering (Grade: 88.20%) Pune, Maharashtra

Technical Skills

Programming Languages: C++, Python, Core Java

Frameworks and Libraries: HTML, CSS, Bootstrap, JavaScript, Flask, TensorFlow, Keras, Numpy, Pandas, Seaborn, scikit-learn SQL, MySQL, MongoDB

Tools: VSCode, Eclipse, GitHub, Git, Google Colab, Jupyter Notebook

Concepts: Operating System, Computer Networks, DSA, Database Management Systems, Artificial Intelligence, Machine Learning, Deep Learning, Natural Language Processing, IoT, Cloud Computing, Software Engineering, Data Science

Experience

- IOTIOT.in** Aug '21 - April '22
Deep Learning Intern Pune, Maharashtra
- Modified the machine learning algorithm for the weapon detection system to achieve **96.2% accuracy**. Utilized tools such as **Google Colab, Docker, LabelMe, and GitLab**.
 - Enhanced model accuracy by 5% by optimizing the architecture with an in-depth understanding of DNN and CNN.
 - Tech Stack: **Deep Learning, Computer Vision, Flask, Python.**
- Excelerate** Jan '24 - Feb '24
Data Analyst Associate Intern Remote
- Throughout the internship, constructed **interactive dashboard** that provided clear **visualizations of sign-up trends** and **participant demographics**, allowing stakeholders to quickly grasp key insights and make informed decisions.
 - Utilized **Pandas** and **NumPy** in Jupyter Notebook for analysis and modeling, including **feature engineering** and **normalization**. Performed **data cleaning** and **preprocessing** with Python and visualized insights using **Seaborn**.
 - Tech Stack: **Python, Data Science, Data Analytics, Jupyter Notebook, Google Looker Studio**

Projects

- Weapon Detection System** | *Python, Flask, HTML, CSS, JavaScript, OpenCV, Yolo V3, SSD v1 v2*
- Developed an **Object Detection-based Weapon Alert System (Knife, Gun)** accessible through a website, using **SSD V2** with **96.2% accuracy**.
 - Improved model **inference speed (45 FPS)** without compromising on accuracy by researching and modifying the existing **SSD architecture**.
- Skin Cancer Prediction** | *Python, TensorFlow, Keras, NumPy, Pandas, Matplotlib*
- Designed a **CNN with 2D convolutional layers** and **max pooling** to Predict skin cancer, incorporating **data augmentation** for improved generalization, achieving an **accuracy of 82%**.
 - Implemented the model in TensorFlow and Keras, trained with a **batch size** of 7, different **stride, filter, and max pooling sizes**, and used the **binary cross-entropy loss function** to enhance detection accuracy.
- Telecom Churn Analysis and EDA** | *Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn*
- This project is on telecom churn analysis, machine learning techniques such as **SVM, Random Forest, and Naive Bayes** are used, with performance evaluated through AUC and ROC metrics.
 - Key techniques include data visualization with seaborn and matplotlib, and feature importance analysis to understand factors influencing churn. The Random Forest model achieved an **accuracy of 96%**.

Achievements & Certificate

- Recognized for **securing a position among the top 37 projects** in the **EY Global Delivery Services** 6-week internship with **AICTE**, focusing on Advanced Data Analytics. ([Project Link & Certificate Link](#))
- Recognized as a **Star Performer** in the Excelerate internship and awarded a **\$1,000 scholarship from Saint Louis University** for outstanding performance.
- [Oracle Cloud Infrastructure 2024 Generative AI Certified Professional](#)
